

International **Erosion Control** Association

IECA Faculty Qualifications

IECA Faculty is a team of instructors who are well versed in the many facets of erosion, sediment, stormwater and the controls required to protect receiving waters from potential pollutants associated with these concerns. The faculty will consist of instructors from various regions of the world who have the ability, the skill set, and the desire to help educate the industry. The faculty is required to meet a minimum set of requirements for acceptance, and they will be required to maintain their education and experience levels. The faculty should also recognize that this is not a self promoting nor product promoting forum.

IECA Faculty must meet the following basic requirements in order to qualify for faculty status for the IECA Live training initiative:

- Faculty must be IECA members in good standing
- Faculty must have a minimum of 7 years of experience in Erosion & Sediment Control
- Faculty must demonstrate competency in multiple E&SC disciplines
- Faculty must be proficient in training Core competencies in a minimum of 2 of the 8 Technical Sections of the IECA Educational Program
- Faculty must have a history of effective classroom delivery supported by positive evaluations
- Faculty must be able to travel
- Faculty must have a collection of training material and content for delivery and be willing to share that content for IECA training purposes.
- Faculty must maintain their level of education and field experience to ensure that they can continue to provide the most up to date and relevant information.

If you feel you meet the above qualifications and would like to begin the process of joining the IECA Live faculty, please e-mail education@ieca.org.
